

GINGER LIVE IN ZÜRICH

„Live in Zurich“ is the second live album of the psychedelic bluesrock band Ginger. After two years and 70 live shows back home as well as abroad, those four young people hailing from Zürich have clearly taken their position in the 60ies/70ies scene. Ginger is a band mainly concipated for the stage, so it is only logical that this promising fourpiece – following the tradition of the old bluesrock and american jam bands - offers its jammy and experimental live shows on record.

The album „Live in Zurich“ is an official bootleg, taped with a multitrack harddisc recorder on the occasion of a live concert in Zürich in Mai 2008. This record is being produced and distributed as an own production in cooperation with the German label „World in Sound“.

This 60-minute live record features warm blues, lively funk and impulsive guitar driven psychedelia. It mirrors well the stylistic spectrum of Ginger and gives a glimpse of what expects us at one of their explosive live shows.
